From selecting multifunctional vanities to using light colors and choosing decor items that serve multiple purposes, there are many tips and tricks to make the most of a small guest bathroom. Let's discuss some of those...

Space Planning

To maximize the space in a small guest bathroom, including a shower, carefully plan the layout and storage options. One way to achieve this is to work with the existing layout and look for ways to optimize it without overfilling the area. This could involve rearranging shelves and cabinets or reworking the entire bathroom remodel.

Keeping as much open floor space as possible is crucial to create an airy and spacious feel. You can achieve this by utilizing wall-mounted shelves or baskets for extra storage options, freeing up counter and cabinet space. Another useful strategy is installing corner shelving units to use all available vertical space effectively.

By getting creative with your storage solutions and maximizing your layout, even the smallest guest bathroom can be transformed into a stylish and functional space.

Flooring Options

When selecting bathroom flooring for a small guest bath with a shower, it's essential to prioritize durability and waterproofness. Non-slip tiles are an excellent option since they provide an extra safety layer while adding an aesthetically pleasing touch. Stylish and durable materials like vinyl or laminate wood are also suitable since they resist moisture well and are easy to clean.

Regardless of the material, ensure it's suitable for wet areas for long-lasting results. Consider adding rugs or mats to provide extra traction on slippery surfaces while bringing warmth and texture into the space without taking up much room.

Fixtures & Accessories

Keep hardware size proportional to the room and choose matching materials and colors. Remember small details like soap dishes and toilet paper holders.

Add personality and charm to the space with accessories like towels, candles, plants, rugs, or artwork. Considering all these factors, you can create a comfortable and stylish guest bathroom.

Vanity & Mirror Selection

For a small guest bathroom, choose a vanity and mirror that are both stylish and space-saving. They should be proportional to create a balanced look, such as a slender sink paired with a tall, narrow mirror or a wide basin with a rounder frame.

This can create a sophisticated atmosphere in the room. Storage mirrors can be helpful in smaller bathrooms.

Having a large wall-mounted mirror above the vanity can provide the illusion that the room is larger.

The right combination of vanity and mirror can make a big impact and transform the area into something special, leaving guests feeling refreshed after their stay.

Storage Solutions for small guest bathrooms

To create a tidy and functional small guest bathroom, efficient storage solutions are crucial. Begin by choosing vanity and mirror options that fit the available space.

Consider incorporating space-saving storage solutions such as wall shelves, hanging cabinets, or floating shelves for towels and toiletries. Hooks can also be added above or beside the sink for additional hanging space.

To maximize available space, explore areas such as behind doors or beneath sinks to add extra shelving. By strategically planning your storage solutions, you

can create an organized and clutter-free guest bathroom that will make your visitors feel at home.

Is Guest Bathroom With Walk-In Shower Possible?

A walk-in shower could be a great choice if you're considering renovating a small guest bathroom and want to create a luxurious and functional space.

Many homeowners like to remove the bathtub in their guest shower area and create a tile shower floor and walls.

It can make the room appear larger, and with the right design, it can be both practical and stylish. To make the most of the space you have, consider the following tips:

- Evaluate the available floor space and what is around the shower. In Arizona, the toilet is commonly next to the guest shower. So if you want a walk-in shower, you'll probably want sliding glass doors.
- Utilize the ceiling height and add shelves over the entryway for extra storage. This not only provides more storage space but also helps to break up any large empty areas.
- Choose glass doors instead of curtains to keep water from splashing outside of the enclosure while still providing an unobstructed view of the bathroom.
